Building Update:

Station 203 was struck by lightning. It appears that the well head was struck directly requiring replacement of the pump, plumbing, wiring and pressure switch. The Generator was also badly damaged by the strike, and we are working with Axis Electric to make those repairs. All other systems appear to be functional. SDAO/SDIS has been contacted and we have started a claim for the event.

We continue to make significant progress on the electronic reader board at station 201. Station 203 station painting to be scheduled soon with McClinton Painting.

Community Involvement/Meetings:

The Department was well represented during the Philomath Frolic. Crew and many volunteers participated in the parade, rodeo coverage and other events.

The Wildland Community Event was very successful. 68 Community members attended, and the video has been viewed 638 times on our Facebook page.

Ashley and I met with Oregon State Senator Anderson and discussed issues related to our District.

Strategic Plan Update:

See attached.

DC Rich Saalsaa**

Statistics for July 2024

Total calls: 112

Fire calls: 50 (45%)

EMS Calls: 62 (55%)

Yearly calls as of 31 July 2024: 642 – Last year at this time: 568 (+13% YOY)

Call volume > 100; highest fire call percentage in recorded monthly statistics; highest weekly call volume on record: 41 calls (nearly 6 calls/day average for 7/5-7/11/24)

Significant calls:

7/1 MVC (Lincoln County) - PFR was requested by Lincoln County to respond mutual aid to this incident. PFR responded with an engine company of four and a chief officer (DC Saalsaa). Reports were of a two-car head on collision with entrapment, and another truck and camper trailer that left the highway and was down an embankment. Life flight was requested while our units responded to the scene. They were to land at Ellmaker State Park. PFR managed two vehicles, one with a single driver that was trapped and in critical condition, and another vehicle with two occupants, one that was deceased and another with critical injuries but not trapped (ultimately that person transported by PacWest to GSRMC). The highway was completely closed, and Toledo Fire were managing other patients from the westerly wreck, approximately ¼ mile west of this scene. The entrapped patient was transported by Life Flight to GSRMC, where he later died from his injuries. The scene was turned over to OSP for accident investigation.

7/2 Small Misc Fire – Small fire on the railroad tracks, set by sparks from passing train. PFR assisted in extinguishment, railroad notified.

7/7 ALLCO – Small roadside fire along Hwy 34. ODF and Chief Ferguson on scene first and all other units cancelled. Caused by discarded cigarette butt.

7/8 ALLCO (Monroe) - PFR sent a brush truck and duty officer to assist Monroe Fire for a grass fire in a field – caused by harvesting (blade hitting a rock).

7/8 ALLCO (Monroe) - PFR sent a brush truck and duty officer to assist Monroe Fire for a grass fire in a field – same property – a different part of the field.

7/8 ALLCO (Monroe) - PFR sent a brush truck and duty officer to assist Monroe Fire for a grass fire in a field – a neighboring property – all doing harvest of grass.

7/9 Gas Leak – Construction crews hit a 1" low pressure gas line while working with a backhoe. PFR has one engine and a brush truck standing by, along with Chief Ferguson who was the incident commander.

7/10 Conflag – DC Saalsaa sent to the Larch Creek Fire in Dufur OR. Fire currently over 13,000 acres.

7/10 Conflag – PFR responded with a heavy brush truck with three personnel to the Larch Creek Fire per conflagration declaration by the governor.

7/11 Large Wildland Fire (Monroe) - PFR sent a brush truck, a tender, and duty officer to assist Monroe Fire for a grass fire in a field.

7/12 Small Wildland – roadside fire, handled by ODF and Chief Ferguson. We responded with a brush truck that was cancelled enroute.

7/14 Conflag – Capt. Andy Loudon mobilized to the Falls Fire in Burns OR as part of the OSFM Incident Management Team (IMT) as a Deputy Incident Commander.

7/15 Conflag – Lt Taylor and crew sent from the Larch Creek Fire to the Lonerock fire as part of a Benton County Task Force along with Corvallis Fire, Adair Fire, and Monroe Fire.

7/16 ALLCO – 1.6-acre fire caused by lightning. PFR Chancey Ferguson was incident commander in unified command with Rick Harris of ODF. PFR sent two brush trucks and a water tender. Has assistance from Adair Fire (brush truck), Monroe Fire (brush truck), Blodgett-Summit Fire (brush truck), and Hoskins-Kings Valley Fire (brush truck). ODF also responded with three brush trucks and after control, brought in a 20-person hand crew to complete mop-up of the fire.

GLOBAL THREATS

- BRUTE FORCING
- CONDITIONAL ACCESS POLICY

We have observed an uptick in threat actors deploying the simple but effective method of brute forcing to gain entry into networks - whether it be RDP, MSSQL, or Microsoft 365 identities. Adversaries' initial access attempts can be frustrated both by simple means like ceasing to expose services like RDP to the public internet and also by more complex approaches like conditional access policies and MFA for email, cloud, and VPNs.

PERSISTENT FOOTHOLDS

During this time frame, your cybersecurity platform **analyzed 4,712 autorun events** to discover persistent footholds that, if not remediated quickly, could become malicious threats to your business.

Of those events, there were **3 autorun signals detected** through automated and human analysis. None of the detected signals were suspicious in nature, thus no further investigation was warranted by your security team.

AUTORUN EVENT TRIAGE

WHAT IS A PERSISTENT FOOTHOLD?

Persistent Footholds are mechanisms attackers use to gain long-term access to a network by exploiting common auto-starting applications (autoruns), such as Skype or Google Updater.

By abusing and masquerading as legitimate system components, attackers can slip by other security tools, remaining undetected while planning their next move.

RANSOMWARE CANARIES

During this time frame, your cybersecurity team monitored **282 canary files deployed** on Windows endpoints, which acted as early warning signals for ransomware on your network.

Like the old canary in the coal mine, Ransomware Canaries enable faster and earlier detection of potential ransomware incidents. When deployed, small lightweight files are placed on all protected endpoints—and if those files are modified or changed in any way, an investigation is conducted.

RANSOMWARE IN THE NEWS

Multiple car dealerships across the US are grappling with operational halts due to a ransomware attack on CDK Global, a key Illinois-based automotive software provider serving over 15,000 retail locations. The incident, widely reported on social media, caused significant operational issues that shut down sales, parts supply, and financing operations across North America. CDK initially labeled it a 'cybersecurity event,' but has been criticized for the lack of further communication. Major customers of CDK such as Lithia Motors Inc, Group 1 Automotive Inc, Sonic Automotive, and Penske Automotive Group took proactive steps, filing SEC reports to mitigate impacts. CDK on Friday confirmed an attack by BlackSuit ransomware group, which not only encrypted systems but also impersonated CDK employees and targeted other businesses. Impacted customers are urged to monitor and freeze credit and stay alert for future phishing attacks that may use stolen data from this breach.

PROCESS INSIGHTS

During this time frame, your cybersecurity platform **analyzed 5,625,303 process events** to identify suspicious processes that could lead to malware execution.

Of those events, there were **55 process signals detected** through automated and human analysis. None of the detected signals were suspicious in nature, thus no further investigation was warranted by your security team.

PROCESS INSIGHTS EVENT TRIAGE

WHAT IS PROCESS INSIGHTS?

Before causing disruption, malicious actors use covert processes to stalk the systems they plan to exploit. Process Insights enables your security team to detect these precursor actions.

Once identified your cybersecurity platform is able to stop the maliciously running processes in their tracks, preventing further cyber attack spread.

Powered by:

MDR FOR MICROSOFT 365

During this time frame, your cybersecurity platform **analyzed 22,542 Microsoft 365 events** to identify any that could be potential threats to your Microsoft 365 users or environment.

Of those events, there were **4 Microsoft 365 signals detected** through automated and human analysis. None of the detected signals were suspicious in nature, thus no further investigation was warranted by your security team.

MICROSOFT 365 EVENT TRIAGE

WHAT IS MDR FOR MICROSOFT 365?

As an integral and widespread productivity suite, Microsoft 365 is a high-profile target for threat actors. MDR for Microsoft 365 can detect anomalous logins, suspicious email rules, and other hacker tradecraft within Microsoft 365.

When a potential attack is detected, a security analyst reviews the activity, and an incident report with remediation steps is actioned by your security team.

GLOBAL THREAT SPOTLIGHT

Recently details emerged about a new version of SugarGh0st, a type of malware that lets hackers control your computer from afar. This new version is part of the Gh0st RAT family, which has been around since 2009. Initially seen as a minor change to Gh0st RAT, SugarGh0st is now linked to several targeted attacks by a hacker group called SneakyChef. Security vendors, Vulnera and Zscaler, have reported similar capabilities in ValleyRAT, another version of Gh0st RAT. Both ValleyRAT and SugarGh0st use updated methods to sneak in, communicate with hackers, and steal information, making them very effective. Recently, ValleyRAT and SugarGh0st have been used to attack the military, political groups, universities, AI, and tech companies. With over 1500 versions in the last 15 years, Gh0st RAT is one of the most common and copied types of malware. When new features like those in these versions appear, they usually spread to other malware quickly.

GENERAL ADMINISTRATION
Procedure

CONFLAGRATION COMPENSATION FOR PERSONNEL

PURPOSE:

Occasionally the District may be requested to assist in the form of personnel and equipment out of the district to other areas of the State, or more rarely to another state, as a result of enactment of the State Conflagration Act (including other instances managed by Oregon State Fire Marshal's Office), ORS 476-510-476-610. The Act intends to ensure an adequate response of resources, as assigned by the State Fire Marshal, to mitigate fire emergencies. Usually, the District commits personnel resources comprised of paid and volunteer staff to such incidents.

Whenever the Act is invoked, the providing agency is assured compensation for all expenses during the response period including personnel costs.

COMPENSATION:

When compensation is assured reimbursement through the Act, personnel will be compensated as follows:

Compensation for volunteer personnel is based upon rates set in the Oregon State Fire Marshal Fire Service Mobilization Plan (Plan), and are based upon the position the volunteer is filling during the conflagration for the actual number of hours they are in service on a mobilization up to 40 hours. After 40 hours on a mobilization, reimbursement will be paid at time and one half.

Compensation for paid staff is based on the current actual salary established by the employing District including salary and related benefits.

The State shall reimburse for the compensation paid to employees from the time mobilized resources leave the Point of Departure until they've returned to the station, including two additional hours restoration of apparatus and equipment.

As stated in the Plan, the District shall compensate all personnel the exact amounts as submitted for reimbursement to the Oregon Department of State Fire Marshal on the billing packet.

An exempt administrative employee may be deployed to a State conflagration at the Fire Chief's discretion. The salaries of the Fire Chief and all Fair Labor Standards Act (FLSA) exempt administrative employees are intended to cover all hours worked. Time and a half can be earned by exempt employees for hours under "contract" where the District is being reimbursed by another agency, such as conflagrations.

ORGANIZATIONAL MANUAL

Mutual aid to neighboring districts is not considered working out of the district and is not compensable.

REIMBURSEMENT:

Agencies have 60 days from the emailed date the reimbursement packet is sent to the District to complete the billing packet and return to the Oregon Department of State Fire Marshal for reimbursement.

After the Oregon Department of State Fire Marshal has processed and audited the reimbursement packets and expenditures are authorized, the accounting department will issue reimbursements to the District within 90 days.
